Address Providence, RI
Phone (217) 693 2763

I'm a permanent resident hailing from Australia, who calls Rhode Island home, with a passion for problem solving and design! Web development marries my love of a challenge with my obsession for detail and my desire to build great things for great people!

SKILLS

- **WEB:**
  JavaScript, Query, AJAX, Node.js, HTML, CSS, SASS, React, Express, Bootstrap Ruby, Rails, SQL, postgreSQL, Git/GitHub

- **DESIGN:**
  Illustrator, Photoshop, InDesign, SketchApp, InVision, wire-framing, site-mapping, design mock-ups & prototypes, icon design

EDUCATION

2018
General Assembly
Web Development Immersive

2017 - PRESENT
RISD Continuing Education
Graphic Design Certificate

2010
BFA (Photography major) - Bachelor's degree in Fine Art
National Art School, Australia

2006
B.Econ/LLB - Economics(Social Sciences)/Law
Honors 1st Class
University of Sydney, Australia

WEB DEVELOPMENT EXPERIENCE

2018 **General Assembly:** Web Development Immersive
Completed a 12 week, 500+ hour training course in full stack web development. Trained in a variety of programming languages and learned both front end and back end fundamentals.
  - Created full-stack applications individually and in a team setting.
  - Built RESTful APIs and integrated data from third party APIs
  - UtilizedGit/GitHub for version control

Capstone Project: GLUG
GLUG is a wine preference tracker. GLUG is a SPA built on the MERN stack utilizing MongoDB, Express and Node.js on the back end and ReactJS and React Router on the front end. GLUG employs token authentication and CRUD functionality. GLUG also utilizes Cloudinary's React SDK to allow a user to upload an images of a wine label (or anything wine-related for that matter!) and store that image in a personal gallery as a visual supplement to the text-based preference notes. GLUG also showcases custom logo design, MaterialUI components and responsive design.

Team Project: IMS: Inventory Management Solutions
My team created a Mongodb/Express based API and custom JavaScript client to allow users to create inventories and track quantities. I acted as Scrum-master throughout the project and used both Trello and Jira for project management**.**

Featured Project: catSnack
A pet food tracker. Never waste money on the wrong food again! Built a full stack application (custom JavaScript frontend and custom Rails API) full CRUD and token authentication. Users can insert and retrieve data from a postgreSQL database. implemented 2 levels of a 1-to-many relationship. Consumes a 3rd party API

Featured Project: TicTacToe
Built a front-end JavaScript TicTacToe application (including game-logic) that connects to a third-party Rails API via AJAX. Employs token authentication to allow users to register and sign-in. Allows users to save and retrieve game-play statistics via CRUD requests. Includes custom logo design.

WORK EXPERIENCE

2017-2018 **Blick Art Materials, Providence RI:** Sales Associate | operations, sales, customer experience

2013-2016 **Sephora, Champaign IL:** Skincare Manager | setting sales & productivity KPI's, team management, training, operations

2010-2013 **Banana Republic, Champaign IL:** Customer Experience Manager | sales KPI's, operations, team management, customer service
